GENERAL ATOMICS	USC AI CASE COMPETITION	WPSA 2025
Strategic development	Semifinalist	Research presenter

EDUCATION

University of Southern California | Marshall School of Business — Expected Dec 2027
Master of Science in Business Analytics

Chapman University — May 2026
B.A. Economics; B.A. Political Science, emphasis in Political Economy | GPA: 3.7
Certificate of Applied Statistical Analysis, A. Gary Anderson Center for Economic Research
Honors: Presidential Scholarship; Pi Sigma Alpha; Order of Omega; Dean's List (2022, 2024)

RELEVANT EXPERIENCE

Strategic Development Intern | General Atomics Aeronautical Systems — Jun–Aug 2025
- Conducted defense-market research and synthesized findings that supported senior leadership's decision to pursue a new unmanned-aircraft market.
- Analyzed defense-program budgets, ran financial regressions and built Power BI dashboards; authored materials supporting government-contract proposals.

Graduate Assistant | USC Gould School of Law — Fall 2026–Present
- Evaluate graduate applications and coordinate applicant communications and admissions workflows for Graduate & International Programs, serving an international applicant population.

Office Assistant, Office of Admission | Chapman University — Sep 2024–May 2026
- Processed and audited applications; voted 2026 Admission Student of the Year by the counseling staff.

Legal Intern | Children's Law Center of California — Aug–Dec 2024
- Synthesized approximately 50 case files daily, briefed staff attorneys and supported client intake interviews.

SELECTED PROJECTS & RESEARCH

Assassination Attempt: Media Exposure & Public Opinion — 2024–2025
- Coauthored a multi-semester independent study with Dr. Lewis Luartz at Chapman. Contributed statistical analysis; team methods included R, multiple imputation, propensity-score matching and ordinal regression.
- Presented early findings at WPSA 2025 with support from three travel grants.

Podcast Opportunity Explorer | USC Marshall — Fall 2026
- Co-designing a five-person course app to screen 4.7 million podcast feeds for acquisition and localization use cases. Contributed to Python/SQL/Streamlit architecture, database-side filtering and pytest coverage audits.

Trojan Deadline Hub | USC AI Case Competition Semifinalist — Fall 2026
- Co-designed an AI planner that consolidates syllabus deadlines and grade weights; specified verification checks and uncertainty flags to keep unverified AI output from becoming scheduled deadlines.

Shared-Housing Revenue & Property Prioritization | Chapman — Fall 2025
- Co-developed linear and logistic regression analyses of revenue per bedroom; translated property and location signals into a Top-20 shortlist and pricing recommendations.

Loneliness & Support for Political Violence | Chapman University — Fall 2025
- Independently applied logistic regression, demographic controls and interaction effects; interpreted odds ratios and predicted probabilities to examine loneliness and support for political violence.

TECHNICAL SKILLS & LEADERSHIP

Tools: Python (pandas, pytest), SQL, R, Stata, Power BI, Excel, Streamlit, Git/GitHub, Bloomberg Terminal
Methods: Regression analysis, predictive modeling, machine learning, econometrics, market research
Leadership: Delta Tau Delta Honor Board member; organized the chapter's most successful fundraiser. USC Symphony Orchestra cellist.
